- When you arrive at the last stitch, cut the thread (around 20 cms long) and pass it through the stitch to close the row:

Finishes :

With a yarn needle or tapestry, bring in the threads, taking care to do so in the stitches of the same color as the thread.

Shawl Blocking: this step is very important for the final result of your work and demand care and patience. If you have a lock kit, use it, if not head pins will do the trick. Wash the shawl, mop up the excess water by rolling in a terry towel as not to bend any reason (it would irreparably felting knitting!).

Then starting the actual blocking:

On a foam mat (or modular squares type game for kids, yoga mats, or mattresses 2 places that you do not use), first secure the shawl from the center (top and bottom) without much stretch wool and the upper ends taking care to stretch the equivalently: the triangle shape is made. Then divide all the pins on the edges of the shawl so that the edges are arranged harmoniously, take time to readjust from pins if necessary. Allow to dry completely the work (more will be blocked longer, its shape will be fixed permanently) remove the pins. Cut the different threads already returned flush after having returned a little more if necessary ... and here ... end of your shawl Facile !!
